HO-19: XSLT for book translations

Reuse the XPath results from hands on exercise 18 and create an XSLT file that outputs your results in an html table with the following headers: QUESTION, RESULT, XPATH

```xml
<?xml version="1.0" encoding="UTF-8"?>
<books>
    <book>
        <title>XML How to program</title>
        <translation edition="1">Spanish</translation>
        <translation edition="2">French</translation>
        <translation edition="1">German</translation>
        <translation edition="1">Italian</translation>
    </book>
    <book>
        <title>XML In 24 Days</title>
        <translation edition="1">Japanese</translation>
        <translation edition="2">French</translation>
        <translation edition="1">Chinese</translation>
        <translation edition="2">Spanish</translation>
    </book>
</books>
```

Filename: BookTranslations.xml
