HO-9: Creating a DTD and validating XML

Create a DTD from the following XML document:

```xml
<?xml version="1.0" encoding="UTF-8"?>
<timesheets>
    <employee id="234456" ismanager="false" hiredate="12/01/2003">
        <firstname>Julie</firstname>
        <surname>Smith</surname>
    </employee>
    <projects>
        <project code="TSK2367">
            <task>
                <description>Create project plan for MIJ website</description>
                <duration type="days">
                    <planned>2</planned>
                    <actual>1</actual>
                </duration>
            </task>
            <task>
                <description>Draft the conceptual web site navigation for MIJ</description>
                <duration type="hours">
                    <planned>3</planned>
                    <actual>2</actual>
                </duration>
            </task>
        </project>
    </projects>
</timesheets>
```

Filename: ProjectTimesheets.xml
