HO-16: Processing orders from an XML web service

You receive orders via an XML web service and would like to visualise the data in a browser as shown on the next slide:

Item	Unit Price	Quantity	Price
FRW2431 Blue Shirt	£77.00	1	£77.00
RWQR3 Wedding Hat	£14.00	2	£28.00
MLT 791 Twin Blanketi	£57.00	1	£57.00
MLT 92 Pillow Slip/Multi	£20.00	2	£40.00
SSBK-R Sleeping Bag, Red	£50.00	1	£50.00
SSBK-N Sleeping Bag, Navy	£50.00	1	£50.00
		Total	£302.00

- You are tasked with the following:

   a) Create an XML representation of the data in a file called orders.xml.

   b) Create a stylesheet that will transform your XML data in a file named orders.css.

   c) Link your XML file to you CSS file and open you XML file in a browser to check the similarity to the above screenshot.
